- Creates a beautiful and functional shortcut bar for your desktop. (Aqua means "water" in Latin). - Use a variety of looks for your dock (or just leave it transparent) - Create draggable, resizable, and transparent (animated) launchers. - Includes a quicksilver-like interface to quickly launch your favorite programs. - Auto-hide (and therefore keep your desktop clean from those icons you don't want to see on your monitor) - Add integrated search items to the start bar for quick access. - Supports dynamic icon sizing and move/resizing. - Supports .chm file icons and most system icons. - New: Drag and Drop program EXE to the Dock. (Windows XP or later). - New: User can rename the dock items. - Tons of configuration options. Save the desktop from VLC's long list of bugs by disabling the program's popup menu after every play, dragging to an external player like Mplayer instead of going to the "External Player" tab, turn the icon off completely, or use a darker theme... without much progress. VLC is... VLC is a free and open source (GPL) multimedia player and framework that plays most multimedia files as well as DVDs, audio CDs, VCDs, and various streaming protocols. VLC can be used for playing, recording, converting and streaming audio and video. VLC can be used with LDAP, NIS, UPnP or directly over the internet using a multimedia streaming server. VLC can use multiple back-ends at the same time: MSS/SmoothStreaming, NetShow, Windows Media, QuickTime, RTP/RTSP/MMS, etc. ...with bugs. VLC is also known to crash when you accidentally close it, or when you close any file association. VLC seems to be extremely problematic on my Windows 7. If I close it down, it will crash right back up within a few minutes, and the task bar icon is constantly flashing with "VideoLAN" and "VLC Media Player" underneath it. The program also seems to start a second instance upon clicking the "save" button. I've tried to uninstall/reinstall it, and while it now displays in the Start Menu, I still have all the same problems. I'm out of ideas for fixing it. So right now VLC is awful on

You can set the mouse cursor to any color and even have the cursor change shape. Add drag and drop support to the program. Aqua Dock is usable right away after installation, as it will add the program to your taskbar. Aqua Dock can be managed within your system's Registry. Aqua Dock is a small program. Open your programs quickly through the quicklaunch feature. Aqua Dock Screenshots: More Info: Once having finished installing Aqua Dock, please exit your browser window and open the Start menu. From there, type Regedit, then hit Enter to open the Windows Registry Editor. Navigate to the HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Explorer\ShellEx\Dock folder, then right-click the ExplorerPipeColor (or ExplorerSpatialCombo) key and choose New > String Value. Name the new key to ExplorerPipeColor, then give the value some cool new color using the value picker (as shown here:). You're done with the Registry for now, so close the Registry Editor window and exit the Start menu.Q: Flex - Creating New Objects: Flex or ActionScript? Is creating new instances of objects like MovieClip, Image etc. handled in Flex or in the ActionScript itself? A: In Flex, that object is a graphical object. Just like TextInput, MovieClip, and ComboBox are, in Flex. These are objects defined by the ActionScript language and handle the visual display of the object in question. If you want to create objects in a language and add them to the stage, you would use code like so: var exampleObject:Object = new Object(); stage.addChild(exampleObject); PS3 Will See Free Games Before Others In Japan by March Sony Computer Entertainment Japan recently announced that the PlayStation 3 will see free games made available in the region by the end of March.
