a human body, the sealing ring and implantation stress (i.e., force pulling the sealing ring during use) will break the blood vessel wall. therefore, the sealing ring will not be able to function smoothly, and even the blood vessel may burst.the effect of low dose of di-n-butyltin hydroxide on the immune system in mice. the aim of this study was to evaluate the effect of the administration of the di-n-butyltin on the immune system in the mouse, by following the immune response. the immunological parameters measured in the study were the mitotic index, antibody production and delayed type hypersensitivity. mice were injected intraperitoneally for 30 days with a low dose of di-n-butyltin hydroxide (20

mumol/kg body weight). it is proved that this compound has the capacity of increasing the immunological functions of the mice.the relationship between glycosyltransferase genes and the expression of o-glycosylation of vgp-pr-1a protein produced by the recombinant saccharomyces cerevisiae ifo12672.
