The great thing about this app is that it allows you to pick a sport (or multiple sports) and watch it. However, the major flaw is the lack of autoscrolling. If you scroll, then stop it will show you the last paragraph and the next time you scroll it will display the next paragraph, and so on. This app is supposed to have autoscrolling, but it looks like an automatic feed generator. The screenshot says it will scroll to the next paragraph after 5 seconds, but it will not. I have waited for maybe 20 minutes and it did not. This makes it useless and a waste of time because you have to just sit there and wait for it to do something that it will not. Please add autoscrolling for at least one sport like basketball, baseball, or hockey. By hussain on Jun 14, 2016 2.0.1 I was very happy with the 1st version, I hope to see the same features added for the next version. By Deadbeat on May 16, 2016 1.1.1 Not working 09e8f5149f
