

1.Greeting(title): very simple, very fast, very small. 2.Usage: java com.test.PCAPSimpleParser /path/of/pcapfile /tmp/output Highlight: 1.PCAPSimpleParser support TCP/UDP protocol 2.PCAPSimpleParser is very simple and just load the pcap file from the path 3.Support recent firewalled pcap file, without any special configurations required Happy hacking! Note: You can download the source code and run it on your own pc. For every core module, you can download and run it on your own pc. You can also use it as a simple pcap parser in your app The Dow Jones Industrial Average soared past the 25,000 mark on Monday, sending world markets into a frenzy and cements the 500-point rally that began when President Donald Trump took office Jan. 20. The market climb marks the first time in three years that the Dow has crossed the threshold. Trump has been credited with the rally, and a lot of the success. However, "it's not really President Trump doing it," said Sam Stovall, chief equity strategist at CFRA. "It's the very strong jobs report this morning. The impact of that has very much been a rally this year in the market." Stovall said the market climb is a continuation of a trend. "It's been a move higher, as we have seen, since the last quarter of 2016. We saw that last quarter and the quarter before that," he said. "We have been on a pretty strong move higher since late summer of last year, and that has led to this move higher today." The Dow Jones Industrial Average rose about 400 points. It is now at 25,024, and climbed to a new all-time high. The S&P 500 is up about 13 points and the Nasdaq is up just under

===== PCAPSimpleParser is a simple, small Java parser specially designed for pcap format files which is very simple and efficient. Now it is only support protocol: Ethernet2 --- IPv4/IPv6 --- TCP/UDP. Library details: ===== PCAPSimpleParser is a lightweight class parser written in Java which can be run from Java code without needing to add any dependencies. PCAPSimpleParser supports the parsing of pcap capture files in both the original format and the binary format. Currently we support: Ethernet2 --- IPv4/IPv6 --- TCP/UDP. This project is a Java pure-code project, all source code are in Java. Hardware requirements ===== Compatible with any computer with Java installed. Application features: ===== Simple and easy to use. Support configuration of input file. Support configuration of output file. Support configuration of the protocol. Support configuration of the length of the IP field. Support configuration of the length of the source port. Support configuration of the length of the destination port. Support configuration of the length of the TCP options. Support configuration of the length of the UDP options. Support configuration of the length of the IP options. Support configuration of the length of the IPv6 options. Support

configuration of the length of the MAC address in the Ethernet frame. Support configuration of the length of the TCP sequence number. Support configuration of the length of the TCP options. Support configuration of the length of the UDP options. Support configuration of the length of the IP options. Support configuration of the length of the IPv6 options. Support configuration of the length of the MAC address in the Ethernet frame. Support configuration of the length of the TCP sequence number. Support configuration of the length of the TCP options. Support configuration of the length of the UDP options. Support configuration of the length of the IP options. Support configuration of the length of the IPv6 options. Support configuration of the length of the MAC address in the Ethernet frame. Support configuring of the word size of the IP field. Support configuring of the word size of the source port. Support configuring of the word size of the destination port. Support configuring of the word size of the IP options. Support configuring of the word size of the IPv6 options. Support configuring of the word size of the aa67ecbc25

=====
 4.0.2.06: PCAPSimpleParser version 4.0.2.06 is released. We do not find bugs in this version. And in 4.0.2.05 there are no bugs. And in 4.0.2.05 we can use to crawl simple websites. 4.0.2.05: PCAPSimpleParser version 4.0.2.05 is released. We do not find bugs in this version. And in 4.0.2.04 there are no bugs. And in 4.0.2.04 we can use to crawl simple websites. 4.0.2.04: PCAPSimpleParser version 4.0.2.04 is released. We do not find bugs in this version. And in 4.0.2.03 there are no bugs. And in 4.0.2.03 we can use to crawl simple websites. 4.0.2.03: PCAPSimpleParser version 4.0.2.03 is released. We do not find bugs in this version. And in 4.0.2.02 there are no bugs. And in 4.0.2.02 we can use to crawl simple websites. 4.0.2.02: PCAPSimpleParser version 4.0.2.02 is released. We do not find bugs in this version. And in 4.0.2.01 there are no bugs. And in 4.0.2.01 we can use to crawl simple websites. 4.0.2.01: PCAPSimpleParser version 4.0.2.01 is released. We do not find bugs in this version. And in 4.0.2.00 there are no bugs. And in 4.0.2.00 we can use to crawl simple websites. 4.0.2.00: PCAPSimpleParser version 4.0.2.00 is released. We do not find bugs in this version. And in 4.0.1.99 there are no bugs. And in 4.0.1.99 we can use to crawl simple websites. 4.0.1.99: PCAPSimpleParser version 4.0.1.99 is released. We do not find bugs in this version. And in 4.0.1.98 there are no bugs. And in 4.0.

What's New in the?

Description from the javadoc: A simple implementation of the pcap-parse-1.1.9 specification (Parsing a Simple Packet Capture Format File).
 Usage: long startTime = System.currentTimeMillis(); String pcapName; CaptureFileResult file; try { file = FileUtil.readPcap(pcapFile, pcapName); PcapSimpleParser parser = new PcapSimpleParser(file); // user can easy get all header information List headers = parser.getHeaders(); System.out.println(headers.size()); // udp packet Packet.Packet packet = headers.get(1).getPacket(); boolean isUDP = packet.getProtocol() == Packet.UDP; System.out.println(isUDP); // tcp packet Packet.Packet packet2 = headers.get(2).getPacket(); boolean isTCP = packet2.getProtocol() == Packet.TCP; System.out.println(isTCP); } catch (IOException e) { e.printStackTrace(); } System.out.println("Time used: " + (System.currentTimeMillis() - startTime));

```

PcapSimpleParser.java public class
PcapSimpleParser extends PcapParser{ boolean isShort, isValid; long
startTime, endTime; long packetNum; Header header; // --- protocols --- static
final int PORT_UDP = 20; static final int PORT_TCP = 21; // --- Ethernet ---
static final int MAC_ETHERNET_DATA_TYPE = 0x06; static final int
MAC_ETHERNET_TYPE

```

System Requirements For PCAPSimpleParser:

A laptop or desktop running the latest Mac OS (tested on 10.11.5) A graphic card with hardware-accelerated 3D graphics At least 512MB of RAM A connection to the internet At least 50MB of free disk space Audio input and output (speakers or headphones) Scores The Good The bad Buy on *Note: 1 player has the full version. Thrustmaster's T.Flight 9955 simulator is really fun
