One of the finest examples of the parody and satire of classic fairytales and fantasy literature, Whirlwind Heist is a comedic, meta-twisted, warm-hearted puzzle platformer that pits you against evil, powerful dragons as you take on The Terribly Cursed Emerald in a quest to collect the Seven Sacred Seals and get rid of the Imp. Features: - Comedy and humor dominate the gameplay. You play as The Terribly Cursed Em- dition, a dragon who has been cursed with amnesia and must fulfill seven deadly tasks in order to wake him up. - While the gameplay is an original, puzzle and platform game, the story is loosely based on classic fairytales and fantasy fiction with its main premise being the Seven Seals and the Imp. - Each time you complete a Seal, you will unlock a fully automated platformer sequence that lets you play as a different character in the same world. - The game has beautifully drawn 2D graphics. - Whirlwind Heist has a comical, irreverent soundtrack that you can hear if you don't believe me. It's going to be a funny, awesome adventure with platformers and puzzle games, and I'm so excited to play it! I'll be posting updates, reviews, and more at my blog, The Sexy Ms. Lemon. My dear friend Josey Alvarez, of the wonderful blog Sommerwinds, gave these magnificent witch photographs (above, by Edward John, and below, by Charlotte Berkey) to my beloved Marla. They're the work of two ladies who want their photographs taken by witch photographers like Josey or myself, but they don't realize that even if they pay for a session with Josey Alvarez, she'll ask them to pose in some of our trademark clothing -- including garters -- so it's not very much fun and not for the faint of heart... to me It's not sad, you know, that I'll never be someone you love after I die. It's nice. It was nice to have loved you while I was alive. Maybe, when I hold a baby in my arms, it'll take away my loneliness a little... But I only hope that one day you'll find someone that understands you, that shares your dreams, and makes you as happy as I did... Ella Fan

Paroxysmal nocturnal hemoglobinuria (PNH) is a rare acquired auto-inflammatory disorder characterized by the presence of hemolytic anemia and a deficiency of glycosylphosphatidylinositol-anchored proteins. PNH patients may experience severe, refractory, life-threatening complications that include portal vein thrombosis and liver cell failure. We describe a PNH patient with portal vein thrombosis-associated liver cell injury who developed refractory cytokine release syndrome and hypoxic encephalopathy following lumbar puncture and chemotherapy. We performed extracorporeal plasmapheresis in combination with hypothermic extracorporeal membrane oxygenation to achieve hemodynamic stability and avoid excessive immunosuppression.

So be sure to balance out your community's needs, as sudden collapse of your town can sometimes result in starvation and complete and utter deprivation for your citizenry! How to play: - Tap to select or assign an action to the box to the left of the prompt. - On top of the screen is a bar that shows your remaining time, a meter in the lower-left corner shows your available score and moves along with your time. - If you have so indicated in the overview, you can also press 'i' to show the overview with its 3 bars. - If the pointer is on one of the actions, press 'e' to turn it into the preview window, where you can swipe to change to that action's priority. - If you have several actions, and the pointer is on one of them, press 'b' to go to its pre-preview window. - Tap the 'h' to return to the overview. - Press 'q' to quit and on some devices, go home. - The tap screen can display as a count-down timer as well as a battery meter. - The score-meter is reset after every game as a counter and shows the time left of the game. - The game ends as soon as the meter becomes red, then the game resets to the start of the game, except that you lose your current score. If you would rather call this game "Sim Life 3", because in the early-2000's Sim Life was the godfather of all sorts of simulations, but this game is now a tier of its own and this might be more suitable. Whether you play alone against AI or against your friends, the game has 3 major modes. 1. PLAY is the regular game. You play against a Sandbox or a Challenge-Modes opponent. 2. MULTI is the multiplayer. You play either with a Sandbox or Challenge-Modes opponent. 3. TUTORIAL is the tutorial. You play on the same mode as in 1) or 2) but against your AI opponent (tutorial only). It has no leaderboard or any achievements, so you will have to reach to achieve those. I have tried
