BMI Calculator For Kids Crack Activation Key Download [32|64bit]

Cracked BMI Calculator for Kids With Keygen is an easy-to-use application that gives you the possibility to determine the BMI (Body Mass Index) of children. It only works for kids between years old. The app makes this calculation based on the height, weight, gender and birth date. Calculate the BMI of 2-17 year old kids Furthermore, it supports both the metric and imperial system, which means that you don't have to turn to an external application just to be able to convert pounds to kilograms and feet to centimeters, or vice versa. Installing this tool doesn't take long, and the only notable aspect is that you must have.NET Framework installed or it won't work properly. Set the height, weight, gender, and birth date When it comes to the interface, BMI Calculator For Kids has a single window that shows all options available, stacking the imperial and metric units in distinct tabs. All you have to do is choose the gender between boy and girl, set the birth date by consulting a built-in calendar, as well as specify the height in feet and inches or centimeters, along with the weight in pounds or kilograms. Underweight, normal, overweight or obese range After clicking the "Calculate" button, the BMI calculator reveals the child's BMI, along with range, such as underweight, normal, overweight or obese. In addition to this, it shows the BMI values for what's considered to be underweight, normal weight, overweight or obese, based on the same criteria. Cannot copy or save BMI data Too bad that the software application doesn't have any features implemented for copying, saving or printing all this information, which would've been practical for tracking the progress of your child's BMI. All in all, BMI Calculator For Kids delivers a straightforward interface and intuitive settings for determining the BMI of children by taking into account their height, weight, gender and birth date.
