Q: Zurb Foundation for mobile not centered I'm working with Foundation's mobile grid and the site is not in the center of the screen. It is off to the side. I don't know if this is a zurb problem or an Android problem. I appreciate any help. Hristos A: Turns out that the fixed header's container was positioned absolutley off screen. I adjusted the offsets in the main container. This fixes the problem. An Expensive Mug Says It All Beginning at \$66.95 this mug will work at absolutely any temperature! I bet it will even work perfectly with your favorite iced coffee. The mug is made of microwave-proof ceramic and has no interior shelves or drain holes. You simply pour your coffee and then sit back and watch the heated liquid flow into the bottom of the mug. The mug may seem like an expensive but simple piece of equipment, yet I doubt you'd be disappointed. A few note of caution; there's no way to know for certain if this excellent cup will perform perfectly right out of the box. It should work, but some people do buy "bare" pots and mugs and haven't cared for what they've encountered. So be cautious if you feel buying this and I stress only if you know and can afford to risk it. This mug (and I'm certain there are other brew specifically mugs) is available from NFL.Aylmer's Mitey Survival Guide: Finger Fluff
