It allows you to animate 2D graphics as if they were 3D. With this update, Live2D models can be imported into FaceRig as avatars. Use the provided 2D avatars or . ai file to create your own avatars. This method works for any 2D model. It allows you to animate the model for any look, but also allows you to add multiple effects to add more personality. With FaceRig, 3D avatars import model data to animate them. With the new 3D import feature, you can import 3D avatars for use in FaceRig. You can import multiple avatars as a 2D model, or just selected parts of the avatar.
