What's New In?

Portable NoVirusThanks Kernel Mode Drivers Manager is a useful tool that was created to help you quickly get detailed information concerning system drivers. The application shows in its main window the image name, base address, image size, load order, publisher and kernel driver description. Portable NoVirusThanks Kernel Mode Drivers Manager is also capable of saving driver

logs to make system snapshot creation a more easy process. Q: How to store a function in a hash, and how to call that function from outside of that hash I've got some functions that I want to store in a hash, so that I can use them later on without having to write them all out in the app. However, I'm getting strange errors (no surprise), which I'm probably making some newbie mistake: #hash of functions to be stored in DB my \$functions{'test'} = sub { return \$_[0] + \$_[1]; } #doing this in a loop over @arrays my @test_array = ('20', '50'); foreach (@test_array) { print " [\$_] "; my \$res = \$functions{'test'}->(\$_); print " + ", '\$res', " "; } So that's what I have. What am I doing wrong here? A: You may have just forgotten the parentheses. my \$res = \$functions{'test'}->(\$_); And now you have Missing) after expression Seems like you have indented some of your code to make it easier to read. This is a bad habit. Always put the closing brace after the last statement. You may also want to use strict and warnings. Q: How to replace String with other String I have a string like this: This: String I would like to replace all string with "B" only, resulting in: This: B A: Use String.replaceAll String myString = "This: String"; System.out.println(myString.replaceAll("String", "B")); Result: This: B Aaron May has no more excuses, and he's apparently made none of them. On his latest album, "Weight of Love," the former Kid Cudi collaborator grew introspective, shedding his outer layers of shiny wealth and fame, singing of his unfulfilled dreams in a minimalist fashion. But instead of feeling melancholy, "Weight of Love" gets downright grisly. On "Heartbreak," the second single from his new LP,

System Requirements For Portable NoVirusThanks Kernel Mode Drivers Manager:

Os: Windows 2000/XP RAM: 1 GB HDD: 2 GB Processor: Intel Pentium III 550 MHz Graphics: DirectX 8 or higher DirectX: Version 9 or higher Network: Broadband internet connection required.
