Up & Running is one of the new features in Creative Cloud to enhance your productivity. With this powerful tool, you can have your sidebars visible, like a side browser window when you work and have access to a full Adobe Creative Cloud library when you need to. **What It Does:** The Eraser tool lets you effortlessly remove unwanted content like logos or other non-camera elements, as well as sketch over top of your image to adjust before you add other components to the image. The Marquee tool is a great tool to cut out stripes and other shapes from your images. You can use this tool to crop and select parts of your image. It's great for removing web elements, logos, or other unwanted graphics. As a web developer, you can easily create a combo mode that can be triggered by a shortcut or in the browser. Perhaps you want to instantly activate the color swatches panel by a keyboard shortcut-- this is possible using popup tools. The Filter menu also has a lot of options to save (and apply) various effects to your content, including exposure, blur, colorize, gradient, and more. This is an easy way to edit your content without having to create and apply additional layers and effects. Should you create an image editing application which is simply powerful but needs to store large files and bandwidth? Since the methods of working on Pixel Bender will not be limited by the file size, the answer can be yes. But it's ultimately up to the user to decide if it is worth using the additional space and transfer, especially since the web can avoid the problem by using the data compression technique. e3d0a04c9c
