And this is my get-work-done pane. I hate the desktop that has all my icons that I have to click on, but I don't want to lose my panel! Watch more Avidemux tutorials: Speaking about Ulead VideoStudio 11, it's a full featured video editing program. But what I really like about this program is what you can do in just about every part of it. Scaling, resizing, everything is just so easy. What can you do in this thing? You can do anything, using every single feature. That means that this thing can be a piece of shit that doesn't even do anything to not be a piece of shit. It's only because it's so easy to use it, you can actually use it in almost any way you could dream of. About the name of it: It's called VideoStudio 11, because it's the 11th Edition. That means that it's been on video editing software market for 11 years. It started out in 2002, and back then it was still owned by Avid Technology, who was just like struggling for the past years. It wasn't something that we now had to buy for more than three hundred dollars. Like David said: "People only invest in the 11th Edition of things because they have a lot of investment in it already." Now this version is self-owned, so it's free to use as well. So I do hope you guys will like it. If you don't, it's no problem. I really don't care that much. And also I hope you'll follow me on my Facebook, Twitter, Instagram, and my website. And I think you'll really like my channel! Thanks for watching! For more ways to
